To use an analogy: an omelette is the product of a (relatively simple but skillful) process involving the beating and frying of eggs. The process and the product are clearly two quite different things, and we could call one making an omelette and the other an omelette. Similarly, the grammar is the result of a process. We need to maintain a distinction between the product and its process of creation. - Jianyun Zhang Teaching English to young learners does not end to seeing them read and speak using this language. Once you introduced the basics of reading, writing, and speaking in English, teachers are tasked to assist them towards good grammar. Effective communication skills require proficiency in language functions and structures. That is why at a young age, children should be introduced and be guided to understanding these structures. Hence, the need for instructional materials is clearly imperative.
